Harvard University

OUR TRAINING PROGRAM

Available at wiley.com/go/courage

— WE OFFER CLARITY —

Our proven strategic planning process will bring each member of your team into clear alignment with your purpose, direction, and desired impact. However you define success, we'll teach you exactly how to marshal your resources to achieve your courageous vision for a future that is worthy of your collective efforts and ambitions.

— WE THRIVE ON SPECIFICITY —

We thoroughly tailor our processes to meet your team where it is at this moment and lead it precisely to where it wants to be. Regardless of the size or mission of your organization, our Planning Summits will unlock clear action plans for who should be doing what, why they should be doing it, and when their tasks should be complete.

— WE DEMAND ACCOUNTABILITY —

Our job doesn't end with marching orders. Through a combination of Future- Casting, Ideation Events, and Momentum Meetings, we provide a structured system of follow through and concrete tools to track progress towards pre- determined milestones. We understand that concepts are great, but consistency and a "what next?" focus is what drives the bottom line.

"Initially, my high-powered team arrived very skeptical, but Giant Leap's special processes teased out from us a Strategic Planning document that had buy-in from our entire group. Right now, I can't imagine any other way of having achieved that goal."

Eli Yablonovitch, Nortel Distinguished Professor & Director of the NSF Center for Energy Efficient Electronics Science, Electrical Engineering & Computer Sciences Dept., University of California- Berkeley
